

# FLIP2MEDIA STUDIO RENTAL

Our 3,000 square foot studio provides the room and capabilities for a wide variety of projects. The massive 2 wall cyc is 30 feet long on one side and the other cyc wall is 45 feet. The entire cyclorama can be painted any color and is usually split between green and white. This configuration makes it easy to film either pre-lit green screen chroma key shooting, or white screen cyc work at any time. Our stage has hosted everything from intimate interviews & simple green screen productions to chroma keyed virtual sets and elaborate custom builds. Its quiet air conditioning and unlimited free parking means you can get down to work in our soundstage without interruptions or downtime.

Our fabulous stage is available for rent fully equipped or as a bare room. It is simple to schedule and the most productive, cost effective production stage in the Bay Area and Silicon Valley.

## Master Control Room

Talk shows, exercise videos, and instructional videos can be switched and streamed through our Master Control Room. [Find Out More.](#)

## Green Screen & White Cyc Shoots

Video shoots on a green screen or white background can offer cost-effective approaches to video production. [Find Out More](#)
